

COVID-19 STRATEGIES FOR A SAFE RETURN TO WORK

Regardless of Your Industry

Let's do our part to help flatten the curve, and promote the safety of all employees as they prepare to return to work.

The COVID-19 threat has changed our world, socially, personally and professionally. Eventually though, we'll be back to work, but that raises a number of questions.

- How can I clean my office to reduce the COVID-19 transmission?
- How can I be better prepared if COVID-19 comes back later this year?
- How can I be better prepared for the next pandemic?

We'll also discuss the often confusing difference between handkerchiefs, surgical masks, N95s and "respirators".

If you work in an environment where a respirator is required:

- What the respirator can and cannot do to protect you;
- How to properly inspect, put on and take off, and use your respirator;
- How to check the seal of your respirator (also called a "user seal check");
- What the procedures are for maintenance and storage of the respirator; and
- What the requirements are for federal OSHA's Respiratory Protection Standards.
