

Get the **TOOLS** You
Need to **TRAIN** your
EMPLOYEES for
Emergency Situations!

2-DAY HAZMAT PREP & RESPONSE CLASS

The nature of handling or working with hazardous materials and waste makes accidents a continual possibility, no matter how infrequently they may actually occur. They happen quickly, unexpectedly and require immediate response. This class will provide attendees with the resources to help your employees prepare for and respond to these unexpected situations.

Why this class is for me:

- Do your clients or employees go to locations that require them to wear respirators?
- Are they required to put on PPE of any kind?
- Does your staff know what to do if an accident happens? Who to call?
- In the event of a spill, do your clients or staff know what needs to be done?
- Learn what your employees need to know if they handle/package/transport hazmat!

49 CFR 172.604 identifies the responsibilities of the individual(s) who fields the call in the case of an accident. They must have knowledge of the shipment and be able to immediately provide information on what to do in an emergency. This class will introduce attendees to the 2020 ERG, GHS compliant SDS, HAZMAT terminology, proper selection and use of PPE and Apps, all with the goal to enable attendees to teach others!
